

## Understanding your Dog

Understanding your dog sounds like an easy thing to do, especially for the new puppy. After all, they are so cute and cuddly and just need food, water, and love, right? Yes but also **dogs need a lot of help from us so they know what we want**. So many dogs will learn in spite of their owners but a happy dog will learn more quickly and be happy to do so. Here are some hints to help train your dog **no matter that age or breed**.

The **more senses** you use in teaching the quicker the dog will learn:

-  **Tasting** - treats
-  **Seeing** - luring (follows the reward into command)
-  **Hearing** - speak the command
-  **Touching** - reward by petting
-  **Smelling** - smells the reward

Happy Training,
